### Prague, the ideal place for your conference

The capital Prague is without any question the most attractive tourist destination in the Czech Republic. The city of a hundred spires on the River Vltava is known to people from the whole world and is regularly voted among the ten most beautiful cities in Europe. City of Prague is also very strong connected with physics. Lot of the most famous physicists from the history spent some part of their life in Prague. The Holy Roman Emperor, Rudolph II., invited to Prague famous astronomers, such as Tycho Brahe in the late 16th century, Johannes Kepler formed two of his three eponymous laws of planetary motion in Prague, Christian Doppler discovered so called Doppler's effect when he was working at the Prague Technical University in the 19th century and last but not least Albert Einstein worked as a full professor at Karl-Ferdinand University in Prague 1911 to 1912, before he moved to Germany.

**Prague** is, of course, not only city with rich history. Nowadays Prague is a lively, modern, dynamic city full of universities, theatres, cinemas, clubs, bars and restaurants. Many international corporations have their EMEA headquarters in Prague. Therefore, Prague is the place for meeting people from all around the world in the very heart of Europe.
